Steven, the 530 session will be live streamed.

Re the 330 it would be helpful to understand whatever rationale the group may be considering as the basis for a request to expand the assessment area. They may be using as an example the Asarco Omaha site. And if congressional staff are going to be there we may hear about it later from them, in the form of another letter.

Which one? The 3:30 or 5:30? 5:30 would be fine to attend.

Not clear to me if dtsc or what other governmental agency is attending 3:30 session.
So I'm not sure about that one.

Feel free to call me today.

Steven,

The Independent Review Panel (IRP) for DTSC will be holding a public meeting on Wednesday evening in Commerce at 5:30. Prior to that meeting (at 3:30) I am organizing a meeting for folks who are working on Exide to discuss and more fully flesh out what an expansion of an investigation into lead contamination in East LA would look like. I'm am inviting Congressman Becerra's office and Congresswoman Roybal-Allard's office.

Our technical Advisor, Dr. Wells, will be giving a short presentation on the need for the investigation and what completing evidence exists pointing for the need for the investigation.

At 5:30 the IRP will take public testimony on the shortcomings of DTSC's public involvement program.

This might all be something you would want to attend. I look forward to our call on Monday morning.

Cordially,

Jane Williams

... hey Jane – thanks for the info on the smelters ... I let the SF folks know to coordinate with Matt.

I'll give you a call Monday to discuss water issues.
